

Omoikane Innovations: Website Content Audit & Request

1. Leadership & Board Members

To build trust and showcase the elite engineering pedigree behind the company.

- ☐ **Full Names & Titles** of all board members and key leadership.
- ☐ **Professional Biographies:** Details on their experience, educational background, and past work history (especially relevant defense/aerospace/software experience).
- ☐ **Key Achievements:** Notable career milestones, publications, or patents.
- ☐ **Assets Required:** High-resolution, formal professional headshots for each member (preferably with a clean, dark, or neutral background to match the new site's aesthetic).

2. Company Operations & Future Roadmap

To articulate exactly what Omoikane does today, and where the company is headed tomorrow.

- ☐ **Core Working Areas:** A detailed breakdown of your primary sectors (e.g., specific niches within Aerospace, Defense, Embedded Systems).
- ☐ **Specialized Capabilities:** What specific technologies or methodologies make Omoikane unique in the market?
- ☐ **Future Expansion Plans:** Details on upcoming roadmaps, R&D focuses, or plans to scale operations that can be shared publicly.

3. Awards & Recognition

To establish immediate credibility and industry authority.

- ☐ **List of Achievements:** Significant milestones the company has reached since inception.
- ☐ **Awards Won:** Names of awards, dates received, and the issuing organizations over the years.
- ☐ **Assets Required:** Photos from award ceremonies, high-quality images of physical trophies/certificates, or official digital award badges/logos.

4. Company History & Core Values

To craft a compelling "About Us" narrative.

- ☐ **Origin Story:** The exact date/year the company was founded and the original mission or problem you set out to solve.
- ☐ **Core Values:** The guiding principles of the company (e.g., Precision, Resilience, Indigenous Innovation, Security).

5. Project Portfolio & Case Studies

Crucial for the new design—we need real-world proof of your engineering capabilities.

- ☐ **Project Names:** Titles of completed or ongoing unclassified projects.
- ☐ **Project Details:** For each project, please provide a brief summary of the problem faced, the technology developed (hardware/software), and the final outcome/impact.

- ☐ **Assets Required:** High-quality, real-world photos of the projects (e.g., drones in flight, PCB close-ups, software telemetry dashboards). *Note: Please ensure no sensitive/classified IP is exposed in these photos.*

6. Client Testimonials & Social Proof

To validate your capabilities through the voices of your partners.

- ☐ **Client Quotes:** Direct quotes, reviews, or letters of appreciation from past clients, partners, or government bodies.
- ☐ **Client Details:** Name, Title, and Company/Organization of the person providing the quote (if permitted to share publicly).
- ☐ **Experience Summaries:** Brief summaries of successful client engagements or operational results.
